1 January 2012

Dear Client

**RE: PRIVATE PATIENT ADMISSION FOR CORONARY ANGIOGRAM TO VINCENT PALLOTTI HOSPITAL**

In order to assist in streamlining the admission process on the day of admission, you are encouraged to visit our pre-admission clinic for your documentation to be completed prior to admission. This would also give you the opportunity to familiarize yourself with the hospital environment and to clarify any uncertainties you may have

Please be advised about the following possible hospital costs:  
*(please note these are estimated amounts and are subject to change)*

- Diagnostic Angiogram without any intervention R42 000 (minimum deposit applicable)
- Therapeutic Angiogram (with ballooning of the arteries) R90 000 (excluding stents)
- If stent(s) are used, please add an additional R15000 per stent to the costs of a therapeutic angiogram.

If stenting of the arteries is not an option, you may be required to have bypass surgery, for which the hospital account could be in the region of R270 000.

These estimated costs exclude accounts from any other related service providers such as your doctor, technologist, radiologists, pathology, etc. Also note, these estimated costs are payable on or before admission.

We suggest that you discuss all your options with your cardiologist prior to admission to the hospital, so that you can make an informed decision.

Should you have any queries, please do not hesitate to contact us.

Yours sincerely  
 For VINCENT PALLOTTI HOSPITAL
